

LAPORAN PRAKTIKUM III

LARAVEL

Disusun untuk Memenuhi Mata Pelajaran Praktikum Pemrograman Web
Dibimbing oleh Bapak Ricky Septiandy Pratama Putra Husmildin, S.Pd.

Oleh :

Dimas Yuda Pratama (17691)

XI TKJ 2

SEKOLAH MENENGAH KEJURUAN NEGERI 2 MALANG
KONSENTRASI KEAHLIAN TEKNIK KOMPUTER DAN JARINGAN
MARET 2025

A. LATIHAN

1. Persiapan Awal:

- Kode program

```
PS C:\xampp\htdocs\perpustakaan-sekolah-auth> composer require laravel/breeze --dev
```

```
PS C:\xampp\htdocs\perpustakaan-sekolah-auth> php artisan breeze:install
```

```
PS C:\xampp\htdocs\perpustakaan-sekolah-auth> npm install
```

```
PS C:\xampp\htdocs\perpustakaan-sekolah-auth> npm run dev
```

- Keterangan

- Menginstall Laravel Breeze pada project CRUD sebelumnya

2. Implementasi Authentication:

- Kode program

```
PS C:\xampp\htdocs\perpustakaan-sekolah-auth> php artisan make:migration create_roles_table
```

```
database > migrations > 2025_04_15_005844_create_roles_table.php
 1  <?php
 2
 3  use Illuminate\Database\Migrations\Migration;
 4  use Illuminate\Database\Schema\Blueprint;
 5  use Illuminate\Support\Facades\Schema;
 6
 7  return new class extends Migration
 8  {
 9      /**
10      * Run the migrations.
11      */
12      public function up()
13      {
14          Schema::create('roles', function (Blueprint $table) {
15              $table->id();
16              $table->string('name');
17              $table->timestamps();
18          });
19      }
20
21      /**
22      * Reverse the migrations.
23      */
24      public function down(): void
25      {
26          Schema::dropIfExists('roles');
27      }
28  };
29
```

```
PS C:\xampp\htdocs\perpustakaan-sekolah-auth> php artisan make:migration add_role_id_to_users
```

```
database > migrations > 2025_04_15_005905_add_role_id_to_users.php
1  <?php
2
3  use Illuminate\Database\Migrations\Migration;
4  use Illuminate\Database\Schema\Blueprint;
5  use Illuminate\Support\Facades\Schema;
6
7  return new class extends Migration
8  {
9      /**
10      * Run the migrations.
11      */
12      public function up()
13      {
14          Schema::table('users', function (Blueprint $table) {
15              $table->foreignId('role_id')->after('id')->constrained();
16          });
17      }
18
19      /**
20      * Reverse the migrations.
21      */
22      public function down(): void
23      {
24          Schema::table('users', function (Blueprint $table) {
25              // ...
26          });
27      }
28  };
29
```

```
PS C:\xampp\htdocs\perpustakaan-sekolah-auth> php artisan make:seeder RoleSeeder
```

```
database > seeders > RoleSeeder.php
1  <?php
2
3  namespace Database\Seeders;
4
5  use Illuminate\Console\Seeds\WithoutModelEvents;
6  use Illuminate\Database\Seeder;
7  use Illuminate\Support\Facades\DB;
8
9  class RoleSeeder extends Seeder
10  {
11      /**
12      * Run the database seeds.
13      */
14      public function run()
15      {
16          DB::table('roles')->insert([
17              ['name' => 'Admin'],
18              ['name' => 'Pustakawan'],
19              ['name' => 'Anggota']
20          ]);
21      }
22  }
```

```

database > seeders > DatabaseSeeder.php
1  <?php
2
3  namespace Database\Seeders;
4
5  use App\Models\User;
6  use Illuminate\Support\Facades\Hash;
7  use Illuminate\Database\Seeder;
8
9  class DatabaseSeeder extends Seeder
10 {
11     /**
12      * Seed the application's database.
13      */
14     public function run()
15     {
16         $this->call([
17             RoleSeeder::class
18         ]);
19
20         // Admin
21         User::create([
22             'name' => 'Admin',
23             'email' => 'admin@example.com',
24             'password' => Hash::make('123'),
25             'role_id' => 1
26         ]);
27
28         // Pustakawan
29         User::create([
30             'name' => 'Pustakawan',
31             'email' => 'pustakawan@example.com',
32             'password' => Hash::make('123'),
33             'role_id' => 2
34         ]);
35
36         // Anggota
37         User::create([
38             'name' => 'Anggota',
39             'email' => 'anggota@example.com',
40             'password' => Hash::make('123'),
41             'role_id' => 3
42         ]);
43     }
44 }
45

```

```
PS C:\xampp\htdocs\perpustakaan-sekolah-auth> php artisan migrate --seed
```

- Keterangan
 - Buat migration untuk roles, lalu edit file
`// database/migrations/[timestamp]_create_roles_table.php`
 - Buat migration untuk menambahkan kolom role_id ke users, lalu edit file
`// database/migrations/[timestamp]_add_role_id_to_users.php`

- Buat seeder untuk roles, lalu edit file
`// database/seeders/RoleSeeder.php`
- Update DatabaseSeeder pada file
`// database/seeders/DatabaseSeeder.php`
- Jalankan migration dan seeder

3. Implementasi Model dan Relationship:

- Kode program

```
public function role()
{
    return $this->belongsTo(Role::class);
}

/**
 * Cek apakah user memiliki role tertentu
 */
public function hasRole($role)
{
    return $this->role && $this->role->name === $role;
}
```

PS C:\xampp\htdocs\perpustakaan-sekolah-auth> `php artisan make:model Role`

```
app > Models > Role.php
1  <?php
2
3  namespace App\Models;
4
5  use Illuminate\Database\Eloquent\Model;
6  use Illuminate\Database\Eloquent\Factories\HasFactory;
7
8  class Role extends Model
9  {
10     use HasFactory;
11
12     protected $fillable = ['name'];
13
14     public function users()
15     {
16         return $this->hasMany(User::class);
17     }
18 }
```

- Keterangan
 - Update User model pada file
`// app/Models/User.php`
 - Buat Role model
 - Edit Role model pada file
`// app/Models/User.php`

4. Implementasi Authorization:

- Kode program

```
PS C:\xampp\htdocs\perpustakaan-sekolah-auth> php artisan make:middleware CheckRole
app > Http > Middleware > CheckRole.php
  1  <?php
  2
  3  namespace App\Http\Middleware;
  4
  5  use Closure;
  6  use Illuminate\Support\Facades\Auth;
  7
  8  class CheckRole
  9  {
10      public function handle($request, Closure $next, ...$roles)
11      {
12          $user = Auth::user();
13
14          if (!$user || !in_array($user->role_id, $this->mapRoles($roles))) {
15              return redirect()->route('dashboard')->with('error', 'Unauthorized access');
16          }
17
18          return $next($request);
19      }
20
21      private function mapRoles($roles)
22      {
23          // Mapping nama role ke role_id dari database
24          $map = [
25              'Admin' => 1,
26              'Pustakawan' => 2,
27              'Anggota' => 3,
28          ];
29
30          return array_map(fn($role) => $map[$role] ?? null, $roles);
31      }
32  }
33 }
```

```

bootstrap > app.php
1  <?php
2
3  use Illuminate\Foundation\Application;
4  use Illuminate\Foundation\Configuration\Exceptions;
5  use Illuminate\Foundation\Configuration\Middleware;
6
7  return Application::configure(basePath: dirname(__DIR__))
8      ->withRouting(
9          web: __DIR__. '/../routes/web.php',
10         commands: __DIR__. '/../routes/console.php',
11         health: '/up',
12     )
13     ->withMiddleware(function (Middleware $middleware) {
14         $middleware->alias([
15             'role' => \App\Http\Middleware\CheckRole::class,
16         ]);
17     })
18     ->withExceptions(function (Exceptions $exceptions) {
19         //
20     })->create();

```

```

routes > web.php
1  <?php
2
3  use Illuminate\Support\Facades\Route;
4  use App\Http\Controllers\HomeController;
5  use App\Http\Controllers\BukuController;
6  use App\Http\Controllers\PeminjamanController;
7  use App\Http\Controllers\UserController;
8  use App\Http\Controllers\ProfileController;
9
10 // Redirect halaman utama langsung ke login
11 Route::get('/', function () {
12     return redirect()->route('login');
13 });
14
15 // Route untuk halaman home
16 Route::get('/home', [HomeController::class, 'index'])->name('home');
17
18 Route::middleware(['auth'])->group(function () {
19
20     // Pengalihan dari /dashboard ke /home setelah login
21     Route::get('/dashboard', function () {
22         return redirect()->route('home');
23     })->name('dashboard');
24
25 // AKSES BUKU: hanya Admin dan Pustakawan
26 Route::middleware(['role:admin,Pustakawan'])->group(function () {
27     Route::resource('buku', BukuController::class);
28 });
29
30 // AKSES PEMINJAMAN: hanya Admin dan Anggota
31 Route::middleware(['role:admin,Anggota'])->group(function () {
32     Route::resource('peminjaman', PeminjamanController::class);
33     Route::post('/peminjaman/{peminjaman}/return', [PeminjamanController::class, 'returnBook'])->name('peminjaman.return');
34 });
35
36     // Route untuk mengembalikan buku
37     Route::post('/peminjaman/{peminjaman}/return', [PeminjamanController::class, 'returnBook'])->name('peminjaman.return');
38 });
39
40 // ===== PROFILE =====
41 Route::get('/profile', [ProfileController::class, 'edit'])->name('profile.edit');
42 Route::patch('/profile', [ProfileController::class, 'update'])->name('profile.update');
43 Route::delete('/profile', [ProfileController::class, 'destroy'])->name('profile.destroy');
44
45 // Auth routes (Breeze)
46 require __DIR__.'/auth.php';
47

```

- Keterangan
 - Buat middleware untuk role
 - Edit CheckRole middleware
`// app/Models/User.php`
 - Daftarkan middleware di app.php
`// bootstrap/app.php`
 - Edit route
`// routes/web.php`

#untuk output program dari project ini akan saya tampilkan dibagian Additionally

B. Additionally

1. Setelah menyelesaikan semua tahapan Authentication & Authorization pada modul, saya menambahkan beberapa tahapan sampai web dapat diakses sepenuhnya sesuai dengan ketentuan berikut :
 - Memperjelas fungsi dari setiap user seperti :
Admin → dapat akses penuh
Pustakawan → dapat akses bagian daftar buku
Anggota → dapat akses bagian daftar peminjaman

HASIL

1. Kode Program:

```

<body>
    <div class="header">
        <div style="display: flex; align-items: center;">
            <a href="{{ url('/') }}" style="display: flex; align-items: center; text-decoration: none; color: white;">
                | <img alt="Logo" style="height: 20px; margin-right: 10px;"/> Perpustakaan Sekolah
                | </a>
            </div>
        <div class="nav-buttons">
            <a href="{{ route('buku.index') }}" class="btn">📚 Daftar Buku</a>
            <a href="{{ route('peminjaman.index') }}" class="btn">⚡ Peminjaman</a>
        </div>
        @auth
            <div class="dropdown">
                <button class="btn" onclick="toggleDropdown()">&lt; {{ Auth::user()->name }}&gt;</button>
                <div id="accountDropdown" class="dropdown-menu">
                    <a href="{{ route('profile.edit') }}">⚙️ Profil</a>
                    <form method="POST" action="{{ route('logout') }}">
                        @csrf
                        <button type="submit">Logout</button>
                    </form>
                </div>
            </div>
        @endauth
    </div>
    <!-- Main Content -->
    <div class="main-content">
        <div class="content-wrapper">
            @yield('content')
        </div>
    </div>

    <!-- Footer -->
    <div class="footer">
        <p>&copy; 2025 Perpustakaan Sekolah. SMK Negeri 2 Malang.</p>
    </div>

    <script>
        function toggleDropdown() {
            const dropdown = document.getElementById('accountDropdown');
            dropdown.style.display = dropdown.style.display === 'block' ? 'none' : 'block';
        }

        window.addEventListener('click', function (e) {
            const dropdown = document.getElementById('accountDropdown');
            const button = document.querySelector('.dropdown button');
            if (!button.contains(e.target) && !dropdown.contains(e.target)) {
                dropdown.style.display = 'none';
            }
        });
    </script>
</body>

```

```

2. Output Program

The screenshot shows a web browser window with the URL `127.0.0.1:8000/profile`. The page has an orange header bar with the title "Perpustakaan Sekolah". On the right side of the header are three buttons: "Daftar Buku" (with a book icon), "Peminjaman" (with a red ribbon icon), and "Admin" (with a user icon). The main content area features a sidebar on the left containing a circular profile picture with the letter "A", the name "Admin", and the email "admin@example.com". Below this are three menu items: "Personal Info" (highlighted in orange), "Security", and "Account". The main panel is titled "Personal Information" and contains fields for "Name" (set to "Admin") and "Email" (set to "admin@example.com"). A "Save Changes" button is at the bottom of this panel. At the bottom of the page, there is a footer bar with the text "© 2025 Perpustakaan Sekolah. SMK Negeri 2 Malang."

The screenshot shows a web browser window with the address bar displaying "127.0.0.1:8000/profile". The title bar says "Perpustakaan". The main content area has a header "Perpustakaan Sekolah" with a logo, and navigation links "Daftar Buku", "Peminjaman", and "Admin". On the left, there's a sidebar with a user profile picture (orange circle with "A"), the name "Admin", and email "admin@example.com". Below this are tabs for "Personal Info", "Security" (which is selected), and "Account". The main right panel is titled "Update Password" with a note about using a long, random password. It contains three input fields for "Current Password", "New Password", and "Confirm Password", followed by a large orange "Update Password" button.

The screenshot shows a web browser window with the URL `127.0.0.1:8000/profile`. The page is titled "Perpustakaan Sekolah". At the top right, there are three buttons: "Daftar Buku" (with a book icon), "Peminjaman" (with a red ribbon icon), and "Admin" (with a user icon). On the left, there's a sidebar with a profile picture of a person named "A" and the title "Admin" with the email "admin@example.com". Below the sidebar, there are three tabs: "Personal Info", "Security", and "Account", with "Account" being the active tab. The main content area is titled "Delete Account" and contains a message: "Once your account is deleted, all of its resources and data will be permanently deleted. Before deleting your account, please download any data or information that you wish to retain." Below this is a "Password" field with the placeholder "Enter your password to confirm" and a red "Delete Account" button.

© 2025 Perpustakaan Sekolah. SMK Negeri 2 Malang.

3. Keterangan

Karena semua konfigurasi sudah saya satukan pada Langkah-langkah sebelumnya dibagian additional ini hanya menambahkan untuk bagaimana ***Authentication & Authorization*** ditampilkan, karena yang awalnya tidak menggunakan extends, seperti Format: <x-layouts.app> atau <x-guest-layout>, dst. Jadi menggunakan extends. Dan juga memodifikasi arahan/tujuan halaman web yang secara default Laravel breeze akan mengarahkan ke tampilan dashboard setelah login, disini saya ubah dengan mengarahkan ke tampilan home(frontend saya). Dan juga saya membuat tampilan sederhana untuk profile setting agar memiliki fitur yang sama seperti pada default Laravel breeze yaitu fitur *Update Profile Information*, *Update Password* dan *Delete Account*.
